

RelativityOne is a secure cloud platform that adapts to your unique needs and makes it easy for teams of all sizes to manage and control their data.

From handling smaller projects like internal investigations to scaling up for early case assessments and large litigations, Relativity has helped corporations centralise their data to mitigate risk, unlock operational efficiencies, and reduce cost.

Faster Time to Value

Out-of-the-box functionality and flexible pricing ensure that you can start deriving value from RelativityOne right away.

More Cost Savings

With end-to-end capabilities, you'll no longer need to rely on disparate, separate systems with varying cost structures—you can leverage the power of RelativityOne to cut spend and do more with less.

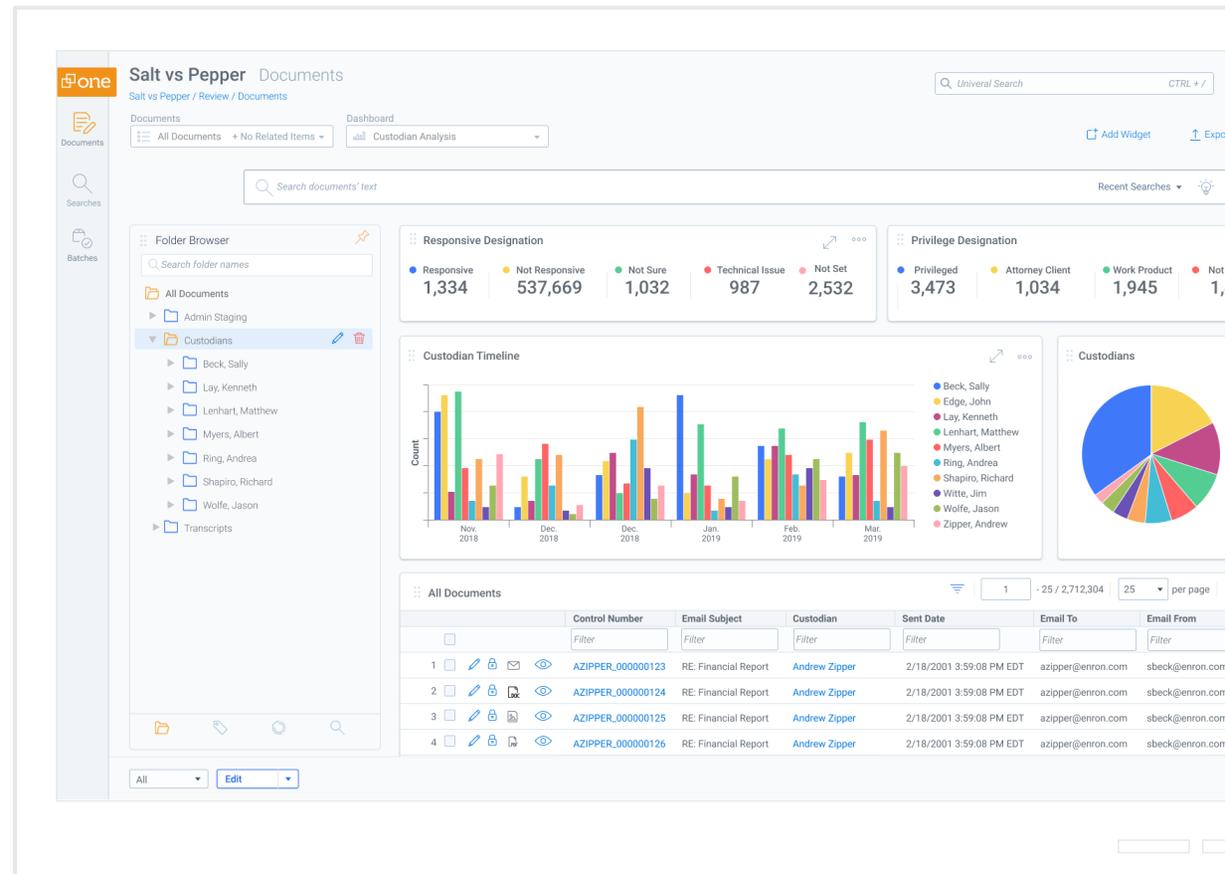

Optimised for Efficiency

Hold, collect, process, review, and produce—all in one platform. RelativityOne runs at lightning-fast page load, processing, and indexing speeds and leverages automated workflows, which means your teams spend less time waiting and more time delivering results.

Built-in Security

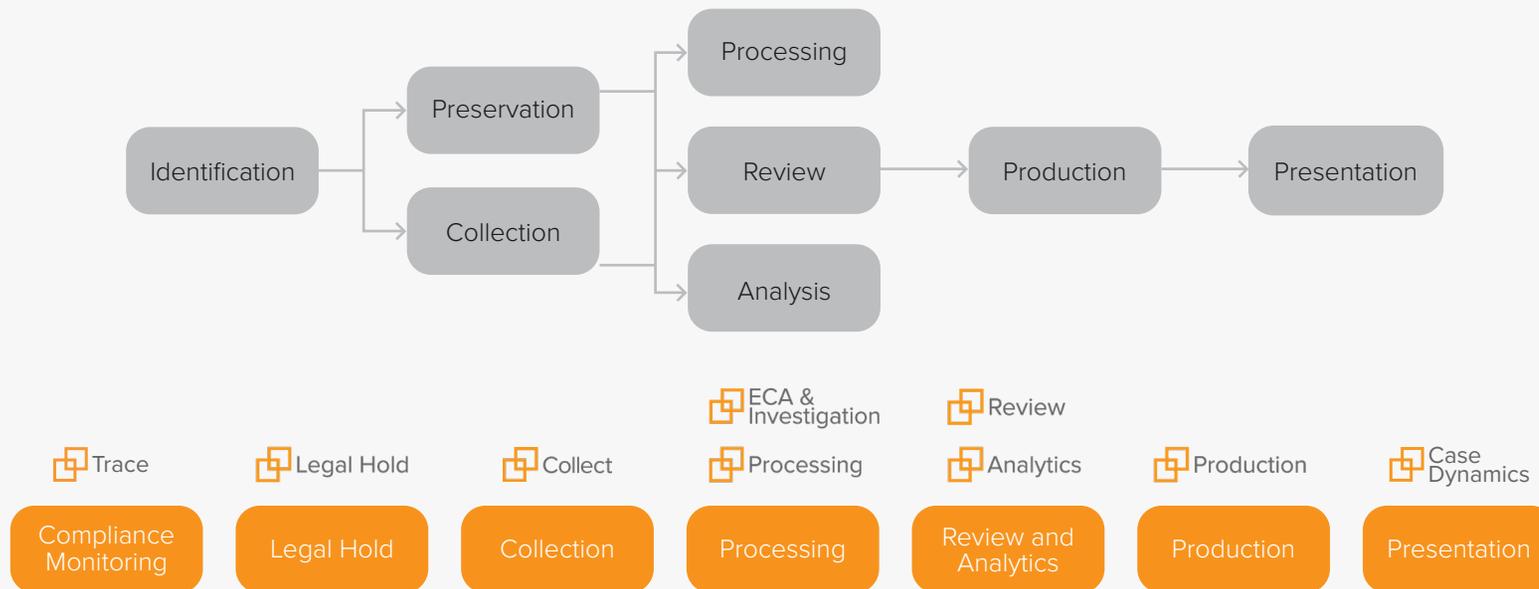

RelativityOne is designed to be the most trusted and reliable e-discovery solution your organisation will ever use. It's built on Microsoft Azure—the most secure cloud on the market—and monitored 24/7 by our global cybersecurity team.

Seamless End-to-End Capability

RelativityOne's end-to-end capability makes it the right tool for any job—all while being able to scale up and down without missing a beat.

Every Stage of the Electronic Resource Discovery Model Is Covered by RelativityOne

Common In-House Workflows Supported by RelativityOne

Collect from Popular Cloud Technologies

Collect directly from the most popular enterprise technologies without ever leaving the cloud—your data remains as secure as possible.

Internal Investigations

Increase efficiencies and save money by culling down data volumes at the outset of an investigation and handle more matters in house.

Legal Holds

Say goodbye to manual, error-prone legal holds. Bring defensibility and repeatability to the practice of issuing holds.

Early Case Assessment

Quickly understand your data and risk with the level of fidelity you need with powerful searching, processing, and analytics tools—all in one platform.

Multi-Faceted Value to Corporate Teams

RelativityOne provides the flexibility, performance, and security that you would expect from an industry-leading native SaaS application.

Flexible

Manage Data Your Way

Take full control of your data—from managing a repository for ECA or investigations to leveraging longer-term options like RelativityOne Store and cold storage for inactive matters or collection data.

Workflows Made for You

Use repeatable, defensible templates and automate workflows to quickly understand your data set and take action.

Scalable

Scale Up or Down

RelativityOne provides elastic storage and compute resources that automatically scale to your needs in real time to quickly, seamlessly, and securely manage your data.

Consistent Global Delivery

Deliver a consistent experience to your stakeholders anywhere in the world.

Comprehensive

An All-Encompassing Platform

Access all the tools you need at each step of the e-discovery process to ensure you can tackle the most complicated cases. Minimise data transfer risk by using one platform.

People-Centric Review

Get a better understanding of the people and relationships in your matter with intuitive ways to analyse communications across custodians and channels.

Accessible

Pay As You Go

With two flexible pricing plans to choose from— pay as you go and flex commit—it's easy for everyone to find value, faster.

Intuitive User Interface

With an intuitive and modern interface, even the most novice user can feel confident in the software and empowered to discover the truth.

Powerful

Investigative Approach

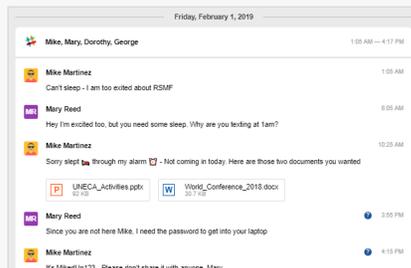

Use advanced analytics, machine learning, and visualisations to quickly sift through volumes of unstructured data and uncover the facts.

Cloud Elasticity

Keep up with performance during peak times, without the work or expense of buying, installing, and maintaining your own infrastructure.

Conceptually visualise your data to narrow in on what's important, even with the most complex projects.

Seamlessly review, analyse, and produce short message data from mobile, instant messaging, and collaboration apps.

Relativity Trust

When it comes to housing an organisation's most sensitive data, there are no shortcuts. Only a fully integrated security program will do. Relativity goes far beyond standard data security and privacy certifications, giving you peace of mind that your data is safe.

Preventative Defence

Our security program is designed to stop attacks before they happen. Using the most advanced technology, our in-house security team proactively investigates trends and events 24/7 to stay ahead of the adversaries.

- We've implemented a proactive approach to gathering intelligence and investigating and analysing threats.
- We cull through millions of events to identify suspicious or anomalous behaviour.
- We protect against insider threats with user and entity behaviour analytics and profiling.
- We monitor the dark web, hacker forums, and our own networks and systems for potential threats and vulnerabilities.
- We conduct internal and third-party vulnerability assessments to identify weaknesses.
- We promote an atmosphere of security awareness with all employees.

Automated Security Processes

We've implemented systems across our entire security posture to maximise the effectiveness of our technology and people—and react before danger materialises.

- We use automated logging to increase the speed to identify and remediate issues.
- We employ a threat intelligence platform as our single source of truth for intelligence.
- All engineers adhere to a secure software development lifecycle.
- We continually scan our source code and enterprise assets to ensure vulnerabilities do not make it into RelativityOne.

Transparent Operations

Our security program is our pledge to our customers. We operate under aggressive compliance standards and a transparent culture to maintain that pledge.

- We are ISO 27001 certified and have achieved SOC 2, Type II attestation, and we are HIPAA compliant.
- RelativityOne is built on Microsoft Azure, which meets more than 90 international and industry-specific compliance standards, such as ISO 27001; SOC 2, Type II; HIPAA; and FedRAMP.
- We regularly share insights with customers and can provide access to their relevant security logs.
- We are part of a community of cybersecurity professionals to share intelligence and elevate security practices.

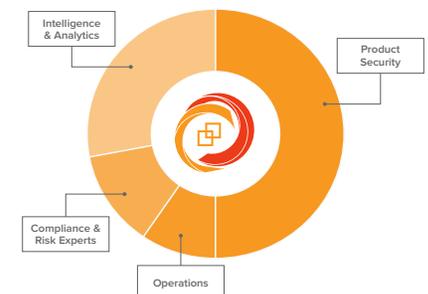

Calder7

Calder7, our security team, leads the charge with highly skilled engineers, analysts, and subject matter experts tasked with protecting your data.

Quick Facts

- Formed in January 2018 and nearly **tripled in size** in the first 12 months
- Name was inspired by Alexander Calder's Flamingo sculpture that resides outside of Relativity's Chicago office
- Last year, the team culled through over **130 billion** events in RelativityOne
- We've had **ZERO severe incidents**

A Whole Community to Lean On

Sometimes, e-discovery takes a village—and we've got one built in.

Work Better Together

When you work with Relativity, help is always around the corner. Connect with 21,000+ users and experts on the Relativity Community site, who are always ready to answer your questions and swap workflow ideas.

Partner with Experts

Get expert solutions from more than 120 global partners, including data management, business process transformation, and custom applications. Our certified partners can work side by side with you, providing all the training and resources you need to accelerate and maximise the value of your RelativityOne subscription.

Meet & Share Knowledge

We have over 180,000 users worldwide, and there are plenty of opportunities for them to meet and learn from one another—including user groups across the globe, as well as our annual e-discovery conference, Relativity Fest.

Get Trained & Certified

Online and in-person trainings, on-demand webinars, and 24/7/365 assistance are at your disposal. You can also get certified in everything from administration to infrastructure.

Join a community of over **180,000** Relativity users worldwide to share ideas, network, and make lasting relationships.
